An hourly rate of **\$45.00 per hour** will be charged for customized data or maps requiring additional staff time. [1 Hour Minimum]

There has been a change to the wording of the *Georgia Open Records Act* that removes GIS data charges from the *Georgia Open Records Act* fee structure and creates wording that allows charges for most GIS data. Local governments may charge "any fees or license fees", "based on the recovery of the actual development cost of creating or providing the geographic information system and upon the recovery of a reasonable portion of the costs associated with building and maintaining the geographic information system."
