## **Socio-economic and Land Use Data**

### **Current Conditions – January 2005**

#### Introduction

Travel Demand forecasting is a tool used to support urban transportation planning. The basic unit of a travel demand model is the Traffic Analysis Zone (TAZ). The Census Bureau aggregated pertinent data from the 2000 Census into TAZs in Chatham County. The data aggregation is known as the Census Transportation Planning Package (CTTP). CTTP is a cooperative effort sponsored by the State Departments of Transportation under a pooled funding arrangement with the American Association of State Highway and Transportation Officials (AASHTO).

#### TABLE HEADINGS

An explanation and discussion of the data included in this report is:

**TAZ (Traffic Analysis Zone):** Chatham County has been divided into approximately 600 Traffic Analysis Zones. The Zones are identified on the attached maps.

**Households:** Households refer to occupied housing units. According to the 2000 Census, approximately 90 percent of the total housing units in Chatham County were occupied. The unoccupied 10 percent account for dwelling units for sale or rent and for units that have been permitted but are not yet occupied. The units in the Household column represent 90 percent of the total housing units in the County. The total housing units are the number of residential units in each TAZ according to the 2000 Census plus the number of residential units (multifamily and single-family) built during the previous year less the number of residential units (multifamily and single-family) demolished during the previous year.

**Population:** The 2000 Census reported the number of people and the occupied dwelling units in each TAZ. From this data, the persons per household in each TAZ was calculated. The population is the number of households in each TAZ multiplied by persons per household in that TAZ.

**Group Population:** Group Population includes the populations of nursing homes, correctional institutions, homeless shelters, and similar institutions. Because of the difficulty of obtaining accurate information on group population and the negligible effect on transportation facilities (institutionalized residents are mostly sedentary), the group population figures were carried over

from the 2000 Census, except in specific cases where a major new facility was built since 2000 (e.g. The Marshes at Skidaway in TAZ 34).

**2005 Employment:**

**1. 2000 Base Data**

The Census Bureau and the Georgia Department of Labor (DOL) produce employment figures. Neither figure reflects the total employment in a given Traffic Zone. The Census figures include only primary, full-time jobs. The Census estimates that its employment figures are approximately 10 percent below the actual total employment. The DOL includes only jobs that are covered by unemployment insurance laws. Independent contractors, part time workers, temporary service workers, and undocumented workers are therefore not included.

The Census 2000 Employment data and DOL data were adjusted to develop the base employment figures for the 2001 model. Adjustments included known major employers, locations of major retail and service employment centers and warehouse facilities from which the number of employees per square foot for retail and service jobs was calculated and applied to smaller, similar establishments. The Census 2000 and DOL 2000 data was used as a guide, but the adjustments were based as much on local knowledge of commercial and industrial conditions as on published data.

The accuracy of the adjustment methodology used by the MPC was verified when the CTPP Place of Work data was released in May 2004. The CTPP data is virtually identical to the MPC Place of Work data developed by the method described above:

<b>TOTAL EMPLOYMENT IN CHATHAM COUNTY</b>			
Census 2000	Georgia Department of Labor 2000	MPC Socio-economic Data 2001	CTPP Place of Work Census 2000
113,087	121,776	127,721	127,045

**2. 2005 Employment**

The 2005 Employment data was developed by the following method:

- a. The 2000 Base data was adjusted according to known major changes in the local economy and/or changes reflected in the Chatham County Tax Assessors land use codes. Examples are construction of Thermo King Warehouses (TAZ 550), construction of the Wal-Mart Shopping Center in Sandfly (TAZ 64), or closing the L’Oreal Plant (TAZ 449). Employment was estimated according to existing employment in similar facilities.
- b. A ratio between the total population and the number of jobs in each employment category was established. This ratio produced targeted employment figures, based on the assumption that the ratio in 2000 would remain relatively constant in 2005. The ratio was analyzed as a check on the method of assigning jobs:

<b>RATIO OF POPULATION TO EMPLOYMENT</b>						
Year	Population	Total Employment	Retail Employment	Service Employment	Manufacturing Employment	Warehouse Employment
<b>2000</b>	<b>231,416</b>	<b>127,721</b>	<b>29,085</b>	<b>76,316</b>	<b>16,920</b>	<b>5,400</b>
Ratio		0.55	0.13	0.33	.07	0.02
Target	257,074	141,390	33,419	84,834	17,995	5,141
<b>2005</b>	<b>257,074</b>	<b>141,821</b>	<b>36,568</b>	<b>84,778</b>	<b>12,316</b>	<b>8,159</b>

The above table indicates that the ratio of total jobs to population is reasonably constant. However, there were more retail jobs created than would have been predicted by the ratio; the number of service jobs were relatively the same; the number of manufacturing jobs decreased significantly; and the number of warehouse jobs was significantly more than would have been predicted by the ratio.

Because of the number of new major retail centers constructed between 2000 and 2005 (Walmarts in Sandfly and Pooler and Highway 17, Target-Bass Pro Shop at Savannah Mall, Kroger at Berwick) it is understandable that the number of retail jobs created exceeds the number that would be predicted by the ratio.

The decrease in manufacturing jobs is verified by DOL figures which indicate that manufacturing jobs in Chatham County declined from 14,284 in 2001 to 11,376 in 2005. The DOL does not include jobs at the Georgia Ports Authority (GPA) as manufacturing but the MPC does. GPA employment was 860 in 2005 which if added to the DOL manufacturing figure of 11,376 is 12,236, within 0.6 percent of the MPC total.

Similarly, warehouse employment based upon the estimated employment at new warehouse facilities significantly exceeds warehouse employment predicted by the ratio. There is no known way to cross-check this data, but because of the number of new warehouses being constructed in Chatham County, it is reasonable to assume that the number of jobs would also increase.

### **Students**

The Kindergarten thru 12<sup>th</sup> Grade (K-12) school population is based upon data published by School Tree, a service that includes the enrollment of public and private schools in Chatham County. Enrollment data was verified by total enrollment figures published by the Savannah-Chatham County Board of Education and by spot checks of larger private schools.

Enrollment in tertiary educational facilities is from enrollment data from each institution. The enrollment of students at the Savannah College of Art and Design was distributed among the TAZ's where SCAD classrooms and dormitories are located in downtown Savannah.

## 2005 Socio-economic Data
