ADDENDUM #1 (RFQ No. 2026-02) FOR REQUEST FOR QUALIFICATIONS ON-CALL PROFESSIONAL CONSULTING FOR CORE MPO TASK ORDERS

ISSUE DATE: OCTOBER 26, 2026

Question 1. Please clarify whether selection and performance under RFQ No. 26-02 would affect a consultant's ability—either as a prime consultant or subconsultant—to pursue or perform future CORE MPO assignments, including the anticipated Regional Freight Plan and MTP.

Response: The On-Call Contract resulting from this RFQ process will be for CORE MPO staff augmentation. It will not include performing the 2055 Metropolitan Transportation Plan (2055 MTP) development and/or Regional Freight Transportation Plan (RFTP) update as the prime consultant or subconsultant. The selected On-Call Consultant will assist the MPC Director of Transportation Administration in certain tasks related to the development of the 2055 MTP and/or RFTP update, such as scope refinement, RFP process, as well as project management for 2055 MTP and/or RFTP. Task orders for all scopes of work will be issued after evaluation of CORE MPO task needs and consultation with the selected on-call consultant.

Question 2. We would also appreciate confirmation as to whether this would apply to projects funded or supported by CORE MPO but procured or administered by another entity, such as the MPC, a local government, GDOT, or another public agency.

Response: If the CORE MPO assigned task is not directly related to a project procured or administered by another entity, such as the MPC, a local government, GDOT or another public agency, this contract will not preclude the On-Call Consultant from pursuing that project. For example, if the CORE MPO assigned task is to review Traffic Impact Analysis, the consultant can still pursue a project by Effingham County to develop concept report for a trail project.

Question 3. If future participation is permitted, please let us know whether any disclosures, recusals, task-order exclusions, organizational firewalls, or other measures would be required to address potential conflicts.

Response: The MPC will have measures in place to ensure that potential conflicts are addressed.

Question 4. Could you please clarify whether firms may submit qualifications as prime consultants for specific services, such as GIS analysis, Census and demographic data analysis, database management, and data visualization, without proposing to perform all transportation planning services listed in the scope?

Response: The MPC will make assignments based upon its needs for additional help; however, Consultant should provide staff that has the ability to perform the majority of the tasks listed in the Scope of Services.

Question 5. Additionally, is GDOT prequalification required for a firm providing only these specialized GIS and data services, or would participation as a subcontractor to a GDOT-prequalified prime be acceptable?

Response: The Prime Consultant must be GDOT pre-qualified.
