In 2014, Chatham County initiated the first ever county-wide strategic planning process that led to the development of the *Chatham Community Blueprint*. This large effort fell within the timeline for completion of the update to the *Chatham County – Savannah Comprehensive Plan*, approval was given by the Department of Community Affairs to allow the County and city of Savannah to align all of the community outreach and feedback efforts of the countywide *Blueprint* with the Comprehensive Plan.

The goal of the community's participation program was to guide and inform Chatham County's community visions, goals, and strategies. This long-term plan will strategically move Chatham towards the accomplishment of specified goals in key theme areas.

The Community will need to collaborate across public sector entities, non-profit groups, and private industry to take ownership of listed strategies and coordinate necessary action steps for each identified item. The *Blueprint* and *Comprehensive Plan* also proposes a timeline in which to implement each strategy while performance metrics will be used to monitor accomplishment of stated goals.

As noted above, due to the update of the entire *Chatham County – Savannah Comprehensive Plan*, all of the communities' visions, goals, and strategies were also updated in 2016 and are much more defined and clarified. Therefore, the status of the 2012-2016 Work Program is shown on the following pages however the updated 2016 Work Program is greatly modified.
