

CORE MPO Freight Transportation Plan

AIR

Freight moving through the airports in the study area accounts for less than 1% of all tonnage and 1% of the freight value.

Air Cargo Tonnage at SAV

The Savannah-Hilton Head International Airport is the only airport in the study area that carries freight

- ⇒ Over the last few years air cargo volumes have decreased at SAV
- ⇒ This decrease is influenced by the number of total flights and the aircraft types used to service SAV
- ⇒ Air cargo was at its peak in 2007 and low in 2009 and since has experienced slight decreases and increases

County	Airport	Type	Runway Length (ft)
Chatham	Hodges Air Park	Private	2,640
Chatham	Hunter AAF	Private	11,375
Chatham	Savannah-Hilton Head	Passenger/cargo	7,002/9,351
