

## 121 W Bolton St

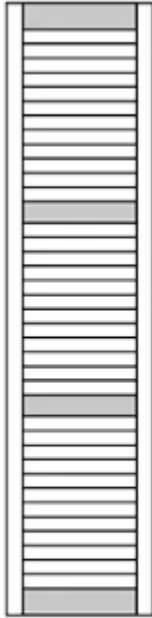

### Shutters

The proposed project includes the installation of traditionally proportioned exterior shutters on the second-floor windows of the residence. No shutters are proposed for the projecting bay window. The proposed shutters are consistent with historic architectural treatments commonly found on Victorian-era residences in Savannah and are compatible with the style, scale, and character of the home. Shutters will be installed only where sufficient wall surface exists to allow for proper sizing and proportion, and will not be installed on the bay window, where shutters would be historically inappropriate.

Here is a photo of the front of the house where the shutters will be installed on the second-floor windows:

The shutters are premium Red Cedar, and will be painted with Benjamin Moore Wrought Iron (a soft black). Below are renderings of the shutter types and the 'S' hold backs to be used. The triple sectioned shutter is for the full-length windows, and the double sectioned shutter is for the smaller window.
