Project: Campechano's Flooring

Project Address: 914 Montgomery St, Savannah, GA 31401

Project Description:

Exterior dibond (aluminum composite) panel, 3mm thick, with laminated vinyl applied to the surface.

Material Specifications:

MAX-metal™ is a 3 mil Aluminum Composite Panel designed for indoor and outdoor applications where being cost conscious is encouraged. This 2-Sided substrate boasts 0.12mm aluminum skins on both sides and is paired with a robust LDPE core. This lightweight panel makes installation easy while maintaining durability for a long lasting sign. MAX-metal™ is ideal for a variety of applications such as: POP signage, way-finding, site signs and is UL recognized for use as a component in electrical signage.

Installation Information:

Screws will be used for installation at least every 24 inches across the top, bottom, and sides of the panel. The panel will be flush mounted to the wall above the garage space.

Building Information:

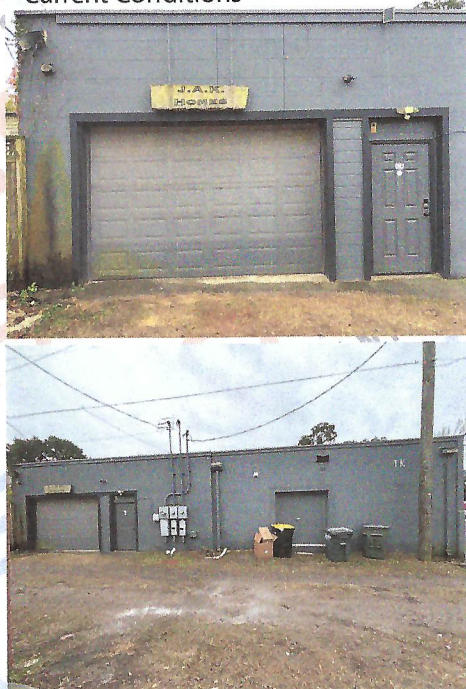

Parcel ID: 20052 03011

Width of storefront where signage is to be installed: 30.6ft

The area where the sign is to be installed is in the alleyway on West Bolton Lane between 914 Montgomery St. and 902 Montgomery St., but the actual address of the location is 914 Montgomery St.
