

311 East Waldburg Street

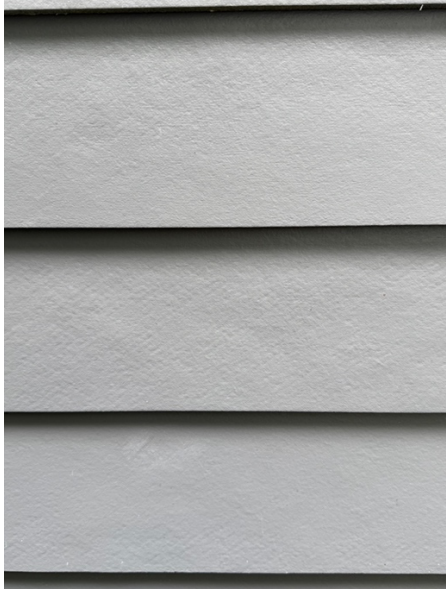

Siding replacement to front of house. Remove wood siding and replace with Hardie siding to match sides and back of house. The current paint does not match to sides or back as hardie board finish is not the same as satin paint. Boards do not match exactly at the corners of the house.

New house wrap would need to be installed prior to hardie siding being put up. Install 6.25 hardie siding in smooth finish, night gray color to match the existing sides.

Non-contributing house.

Building Area Involved

Front of house.

Hardie siding.
