About This Product

Maintain or enhance your outdoor space with this 5/8 in. x 5-1/2 in. x 6 ft. pressure-treated pine dog-ear fence picket, designed for dependable performance in above-ground residential fencing applications. Made from Southern Yellow Pine and pressure treated to help resist rot, decay, and insect damage, this picket is well suited for building new fence runs or repairing existing fences in a wide range of climates. The classic dog-ear profile delivers a timeless, neighbor-friendly look that complements many home styles, while the consistent thickness and uniform sizing help create straighter, more visually appealing fence lines. Easy to cut and fasten with standard tools, this picket supports efficient installation for DIY projects and routine fence maintenance. Beyond fencing, it can also be used for small outdoor projects such as garden dividers, planter accents, or decorative features where treated wood is appropriate. Intended for above-ground use only, this pressure-treated pine picket offers a practical balance of durability, versatility, and traditional style for long-lasting outdoor improvements.

Highlights

- For use in above-ground applications
- Ideal for building new fence runs as well as fence repair
- Pressure treatment enhances durability in wet climates
