

126 EAST GASTON STREET

PIN: 20032 45007

PROJECT DESCRIPTION

The proposed project introduces a new gated entry at the rear courtyard of the residence by modifying a limited portion of the existing stucco wall to accommodate a more appropriate entry location. The gate is positioned to align with and center on the rear door of the house, thereby strengthening the relationship between the architecture and the courtyard while maintaining the integrity of the existing wall enclosure.

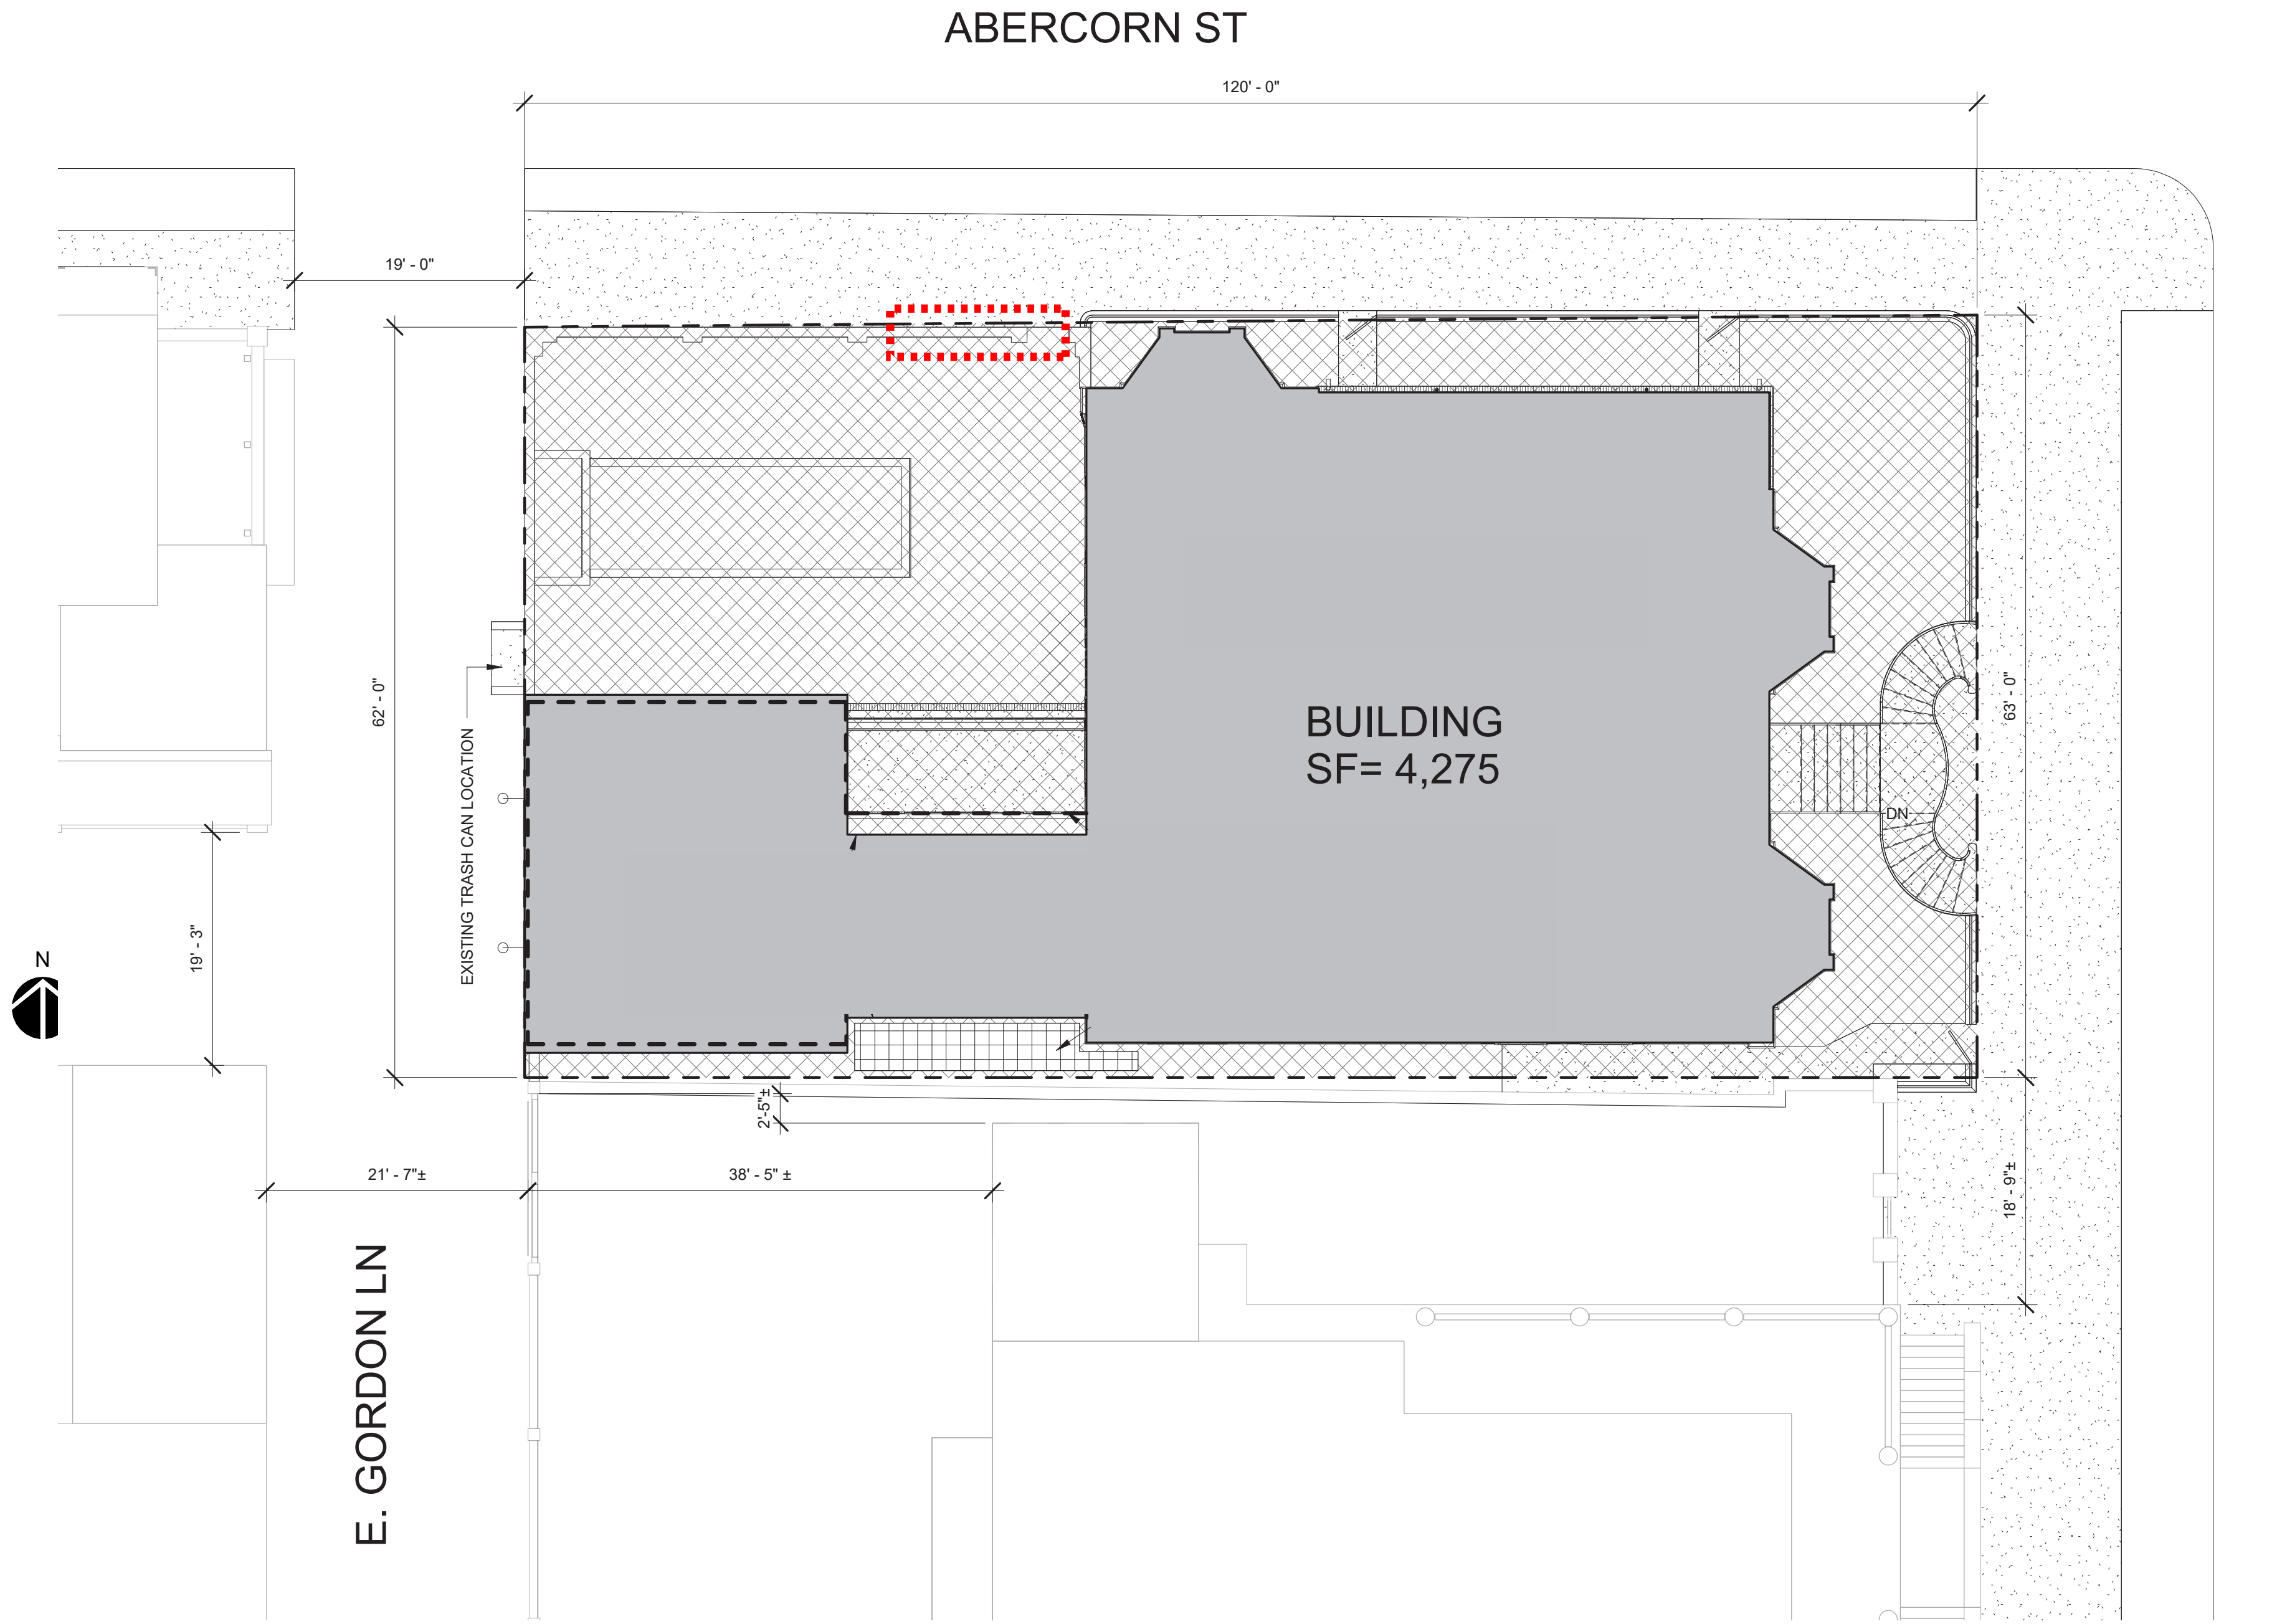

The entry will consist of a pair of gates framed by two columns integrated into the stucco wall. Cast-stone finials will cap the columns, and a limestone cap will be incorporated along the wall and columns to complement the residence's architectural materials and detailing. The design has been carefully developed to read as a natural extension of the existing wall and to remain compatible with the property's historic character and its surroundings.
