OAK STEAKHOUSE | FACADE SIGN

One new letter set to be installed, as shown in the below rendering. They will be made from 1" thick flat cut aluminum and will be painted on all sides, with the backs and returns matching the faces. The letters will be individually stud mounted and installed onto the building within the brick sign band area using toggles and sealant and will stand off 1" from the building. They will be externally illuminated using metal gooseneck light fixtures installed above the brick sign band area using bolts and sealant (by others). They will be architectural bronze and have soft white LED lights which shine down on the sign at night. The font used is a custom logo font.
