

Gate Proposal for 206 West Bay Street

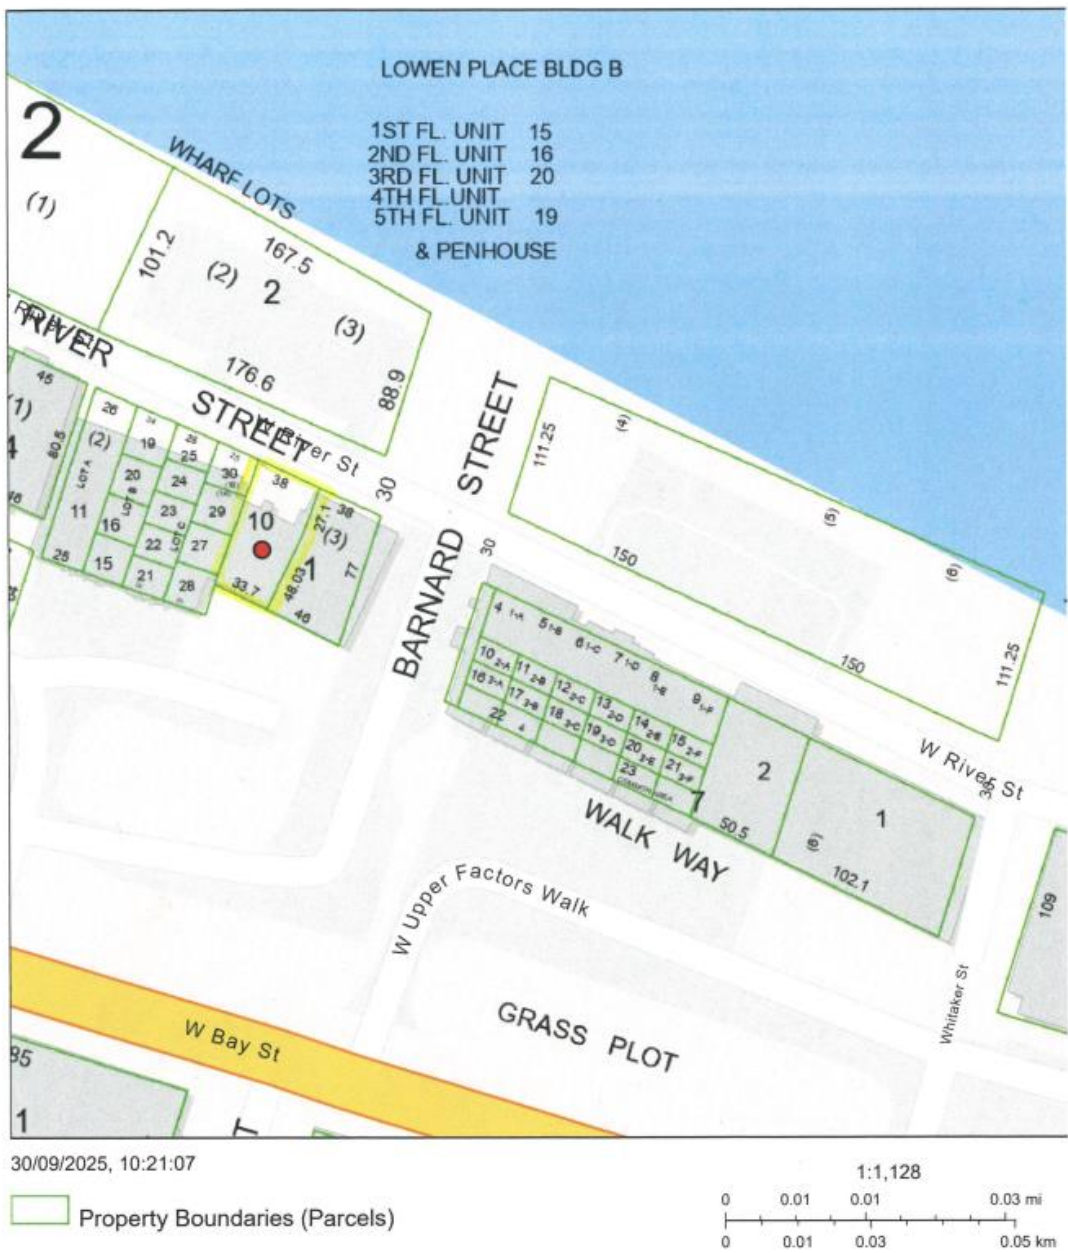

August 12, 2026

Deborah and Matt Thoben

Hello, At our residence at 206 West Bay Street, we have two footbridges that lead from the Barnard Street area and the Factors Walk area on the Bay Street Side to the front doors of our home. We would like to add gates at the beginning of each walkway to coordinate with the existing fences. We would also like to add small signs reading "PRIVATE Residence" for those who believe our home is a store, bar or part of the Charthouse Restaurant next door. As you might imagine we also have quite a lot of people using our bridge area for smoking, sleeping and general loitering. We would like to make it clear that the bridges are not public space.

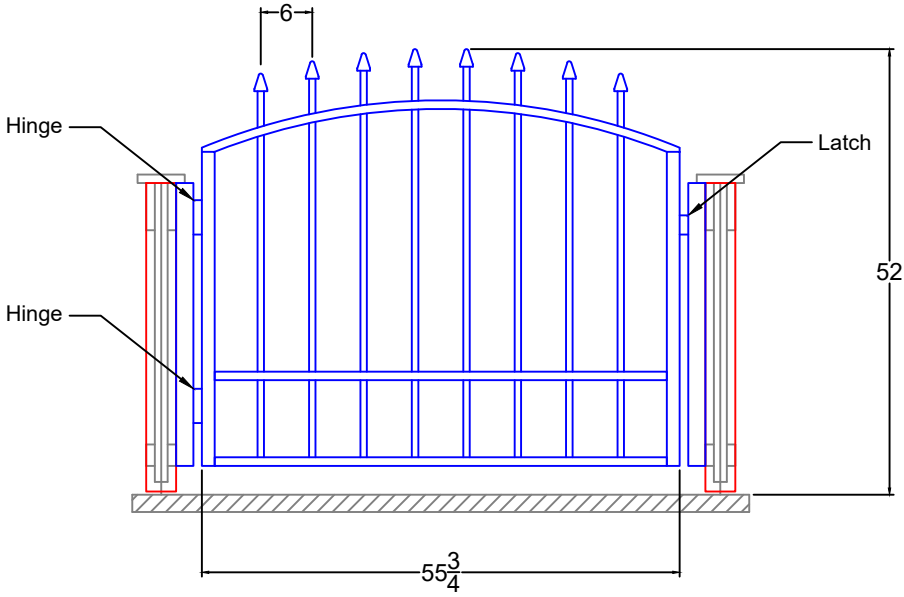

The gates would close by latch but would not be locked.

Thank you for your consideration.
