

Beilwether House

Fencing Project

9/9/26

We propose to remove the non-historic fence/wall that separates our backyard from our parking area and Gaston Lane and install a new fence that will be located 5 feet closer to the house and further from the lane. We would like to do this to allow our guests to park perpendicularly to the lane rather than the current parallel parking. This will allow six guest cars to utilize this area instead of the current two.

Most of our guests currently park at a private lot on Huntingdon Street, which can be inconvenient for them. By allowing more guests to park on property we will increase their satisfaction with visiting Savannah and free up spots in the private lot for other users.

For all-around results, the best way to get the most out of your new equipment is to use it in a variety of ways. For example, you can use the same equipment for both indoor and outdoor activities. This will help you get the most out of your investment and keep your equipment in good condition.

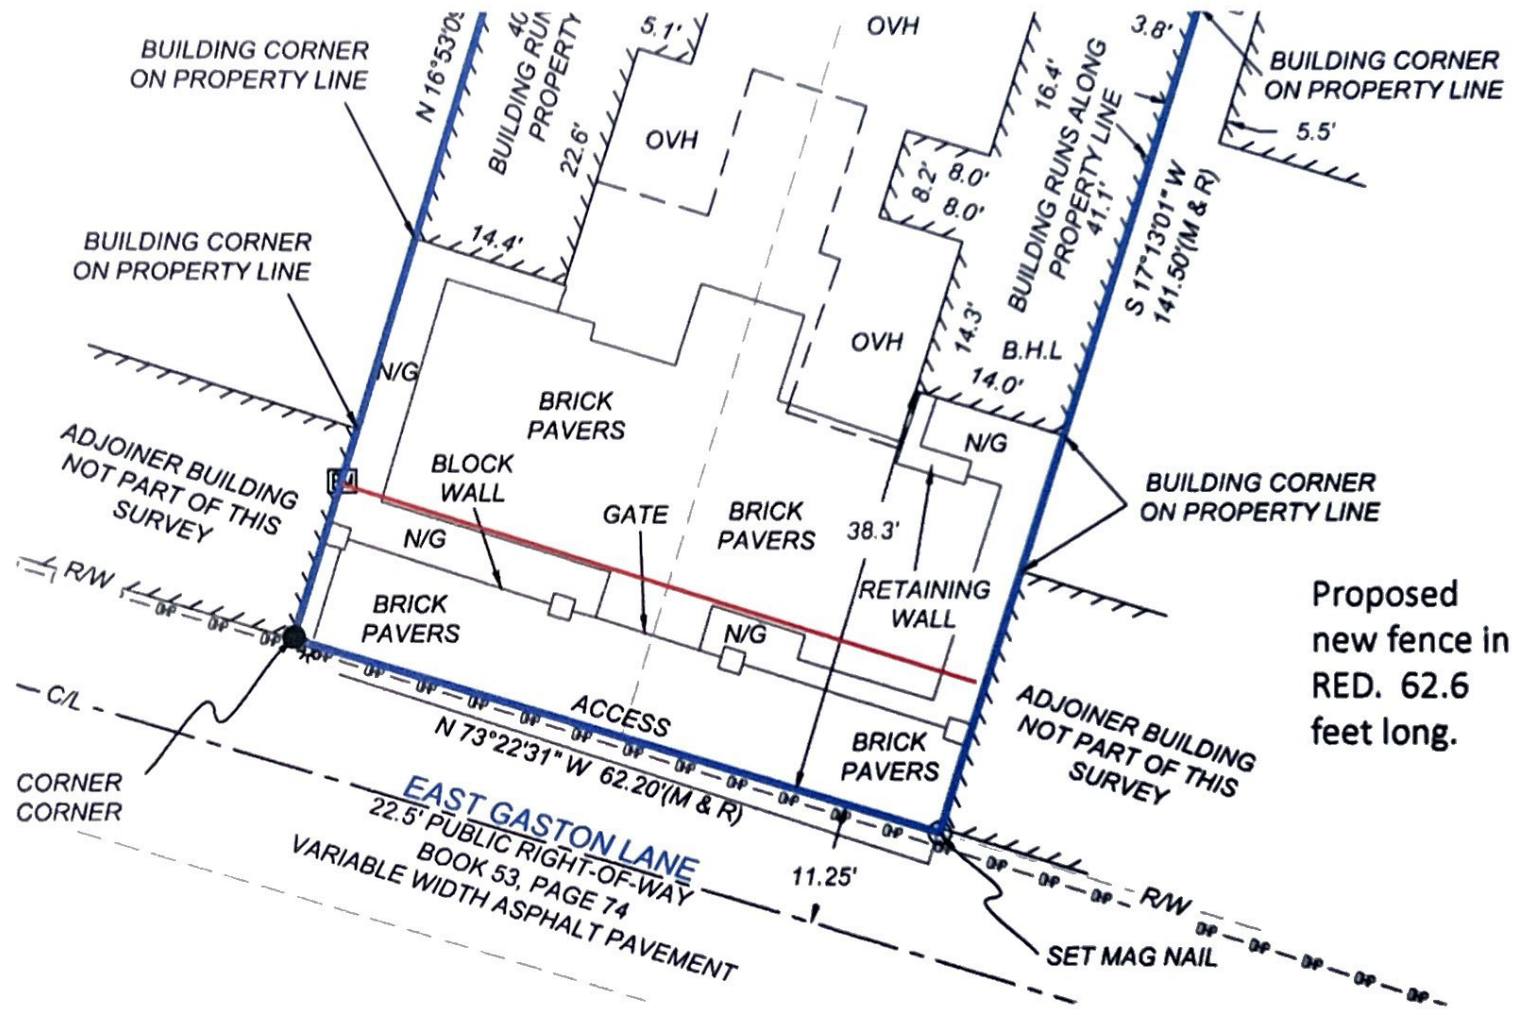

the 1990s, the U.S. economy has been able to maintain a high rate of growth, despite the fact that the economy has been in a recession since 1990. This is due to a number of factors, including a strong labor market, a strong housing market, and a strong financial market. The U.S. economy has also been able to maintain a high rate of growth, despite the fact that the economy has been in a recession since 1990. This is due to a number of factors, including a strong labor market, a strong housing market, and a strong financial market.

MAVERICK (I) INDUSTRIAL

The Maverick-I (Industrial) is our premier iron fencing product utilizing an 11 gauge channel and both 3/4 and 1 inch steel pickets. These pickets can come in 14 gauge, 16 gauge or 18 gauge steel. Industrial Aircraft Rivets are used to attach each individual picket to the rail allowing the section to rack to your job specifications. These rivets provide the strength of a welded product without the rusting that accompanies them. The Maverick-I can rack up to 10 inches on a standard punch channel.
